

## Cubbit data sovereignty and compliance

Innovation, quality, and reliability are the principles that inspire the design and development of Cubbit’s geo-distributed cloud services. In order to demonstrate our commitment and compliance with international industry standards, we periodically undergo external audits by independent bodies on service quality, information security, legal compliance, and risk management.

Category	Details
ISO	ISO 9001:2015 (Quality management systems) ISO/IEC 27001:2013 (Information Security Management) ISO/IEC 27017:2015 (Cloud Security) ISO/IEC 27018:2019 (Cloud privacy and personal data protection)
GDPR	GDPR compliant (EU-based and data geo-fencing capabilities)
NIS2	#3 Backup and disaster recovery #4 Supply chain security #8 Encryption and cryptography #9 Access control strategies (IAM policy) #10 Multi-factor authentication
Public sector	ACN/AgID qualification (PA Cloud)
Others	Cybersecurity Made In Europe Label

Cubbit, a partner of Gaia-X, is Europe’s first geo-distributed cloud storage enabler. Its groundbreaking technology addresses nations’ specific data sovereignty concerns, helping businesses check all the compliance boxes (e.g., GDPR and ISO) while ensuring the best overall total cost of ownership (TCO), data control and providing hyper-resiliency against ransomware and disasters.

Today, Cubbit technology is adopted by 200+ European companies and partners, including Exclusive Networks (a \$4.9B global distributor in cybersecurity, listed on the Paris Stock Exchange) and Leonardo (a \$14B world leader in defence and cybersecurity).
